

Website Management Service

Welcome

At Go Create Design, we have been creating and managing successful websites for our clients since 2006.

Go Create was inspired from the realisation that many business owners do not have the time or 'know how' required to turn a profit from their website.

For many of our clients, we have either helped them generate a good profit from an existing website or we have created a website designed around generating a profit.

Whilst the internet continues to grow, it's more important than ever to ensure that your website is being seen on search engines like Google, Yahoo and Bing.

Also, with the emergence of social media and social networking, now is a great time to employ the services of a web manager who can deal with all these new technologies in a plain and simple way that your business can follow and understand.

We are here to help you turn a good profit from your website, without the need for you to become involved with understanding any jargon or technology required to make your website successful.

A web professional is assigned to you, a person who understands business and talks your language.

Thank you for reading our brochure - we hope you find the website management service valuable.

The Standard Service is just £99 per month.

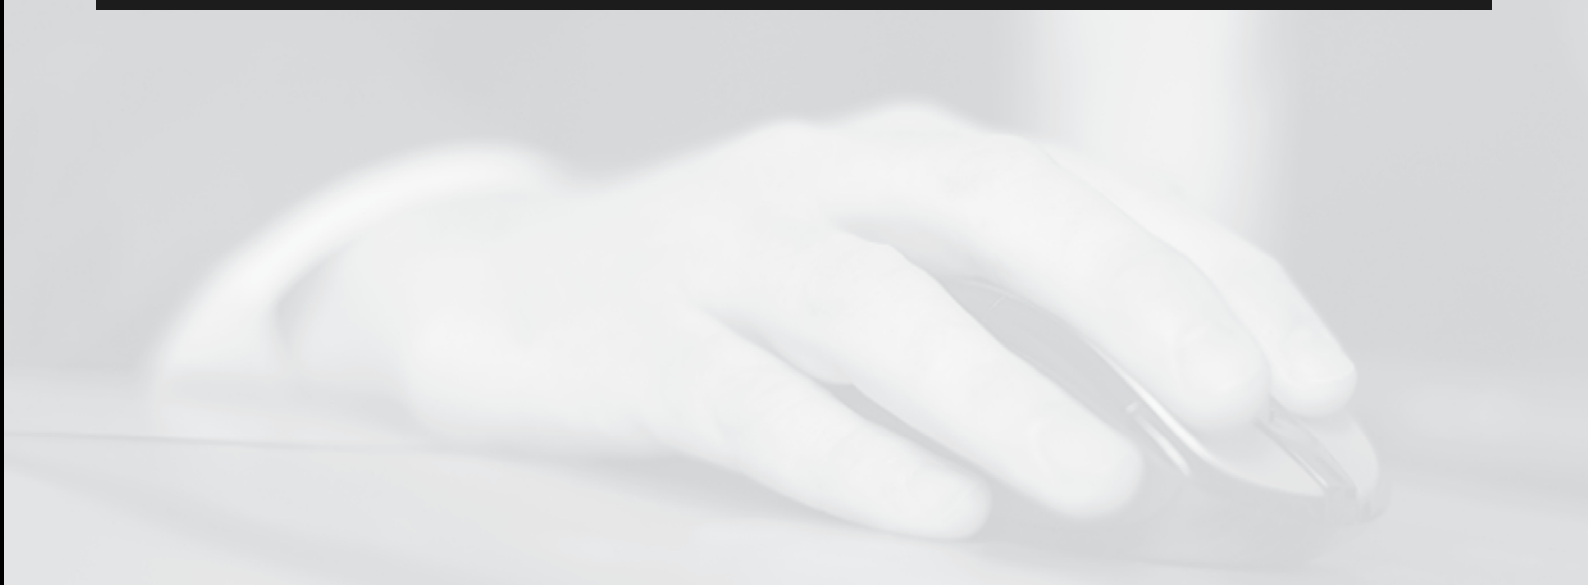

Tasks can include:

Search Engine Optimisation (SEO)

Online Advertising

Content Updates

Managing Website Performance

The Website Management Service

Cost

Our standard service costs £99 per month, which can be paid by standing order, direct debit or cheque. If for any reason you require more than our standard service offers, we would simply discuss any additional costs and revise the fee accordingly.

Contract

As a client, you are not bound to a long term contract. As long as you maintain your monthly payment, the service continues.

Tasks that we can undertake include:

Website Promotion: Managing various functions within search engine optimisation (SEO) online advertising and related media.

Content Updates: Managing web content and updating web pages.

Analysing: Ensuring your website is converting website visitors to paying customers.

Trouble Shooting: Dealing with any issues that may affect the performance of your website.

Tracking Results

Your website and the performance can be independently reviewed through your Google Analytics account. If you do not have one, we will set this up for you.

By using Google Analytics, all data, information and results remain 100% independent; nobody can change or manipulate the information you see.

How to Apply

Please contact us on **01209 711 711** to discuss your needs in person.

Alternatively you can write to us by email on info@gocreatedesign.co.uk
